

The airwaves are public airwaves, are they not? If so, we strongly object to Sinclair Broadcasting, which owns one fourth of the nation's TV stations, being able to broadcast partisan events and passing them off as news.

FCC: If you don't take a stand now, WHERE WILL IT END??? Think of the next presidential election....will the public be inundated with these types of biased "news" events? How can this happen to us?

If you do nothing else for the public, Republicans and Democrats alike, please tighten your rules on the partisan use of public airwaves. It can only result in a more democratic process.

We are Republicans, but believe that actual, true, non-biased news reporting by companies using our public airwaves is necessary to preserve a democratic America.

The protection of the public from this threat is your prime responsibility to us, FCC. Please act now.
